I hereby certify that this correspondence is being deposited with the United States Postal Service as first-class mail in an envelope addressed to: Assistant Commissioner for Patents, Washington, D.C. 20231 on this 2nd day of October, 2002.

By

(Signature of person mailing)Janice Denison
(Typed or printed name of person)IN THE UNITED STATES PATENT AND TRADEMARK OFFICEIN RE APPLICATION OF:

Dwayne Thomas Friesen, et al.

Examiner: T. Ware

APPLICATION NO.: 09/380,825

FILING DATE: September 7, 1999

Group Art Unit: 1615

TITLE: Solubilized Sertraline Compositions

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

RESPONSE UNDER RULE 111

Responsive to the Office Action of July 30, 2002, please amend this application as follows:

D1

1. (Amended twice) A composition of matter comprising a highly soluble salt form of sertraline having a solubility in pure water of greater than 10 mgA/ml, and an amount of a solubilizing agent sufficient to produce a concentration of dissolved sertraline in a use environment containing chloride ions which is 1.5 times higher than the concentration effected by a comparative composition of matter identical thereto but for the inclusion of said solubilizing agent.

D2

7. (Amended once) A composition of matter as defined in claim 1, wherein said solubilizing agent is selected from the group consisting of:

- 1) organic acids and organic acid salts;

- D3
- 2) partial glycerides;
 - 3) glycerides;
 - 4) glyceride derivatives;
 - 5) polyethylene glycol esters;
 - 6) polypropylene glycol esters;
 - 7) polyhydric alcohol esters;
 - 8) polyoxyethylene ethers
 - 9) sorbitan esters;
 - 10) polyoxyethylene sorbitan esters; and
 - 11) calcium salts.

D3

10. (Amended twice) A composition of matter comprising a highly soluble salt form of sertraline having a solubility in pure water of greater than 10 mgA/ml, and an amount of a solubilizing agent sufficient to maintain, for at least 2 hours in 0.075M sodium chloride, a concentration of dissolved sertraline in a use environment containing chloride ions which is 1.5 times higher than the concentration effected by a comparative composition of matter identical thereto but for the inclusion of said solubilizing agent.

D4

13. (Amended once) A composition of matter as defined in claim 10, wherein said solubilizing agent is selected from the group consisting of:

- 1) organic acids and organic acid salts;
- 2) partial glycerides;
- 3) glycerides;
- 4) glyceride derivatives;
- 5) polyethylene glycol esters;
- 6) polypropylene glycol esters;
- 7) polyhydric alcohol esters;
- 8) polyoxyethylene ethers
- 9) sorbitan esters;
- 10) polyoxyethylene sorbitan esters; and
- 11) calcium [carbonate] salts.

D5

15. (Amended twice) A composition of matter comprising a highly soluble salt form of sertraline having a solubility in pure water of greater than 10 mgA/ml, and an amount of a solubilizing agent sufficient to effect, *in vivo*, a C_{max} and/or an AUC which is greater by at least 10% than the C_{max} and/or AUC effected by a comparative composition of matter identical thereto but for the inclusion of said solubilizing agent.
